<u>**Homework 12- Designs**</u>
CS 412

For this assignment, your team's job is to create the **designs** for the final project.

Designs – identify the "how" of your system
    a. Sequence or dataflow diagram (e.g., storyboard)
        i.   Order of events
        ii. Primary and alternate paths
        iii. What needs to be communicated?
        iv. Who are the primary actors?
        v.   What technologies are involved?
    b. UML class hierarchy
        i.   Classes (nouns)
        ii. Methods (verbs)
        iii. Relationships
    c. Etc. – whatever else you deem necessary
